

"7 Minutes Of Science"

Edward Teller has rightly said "The science of today is the technology of tomorrow"

ASME LNMIIT's second version of "7 minutes of Science" was more or less an application of this principle, its aim being to make the students aware about the current innovative research projects and their future.

In this event, we saw participation of around 16 students which included students from Y-14, Y-15 as well as Y-16., who presented to the audience which were again students a topic of their choice, recent discovery or famous phenomena, process or technology, or an innovative idea of theirs. Each participant was given 7 minutes: 5 Minutes for presentation and 2 Minutes for Questions and Answers from the audience/judges.

Diverse range of topics from Virtual Reality, Automated Highway Systems, Hyperloop, Lifi etc were touched covered in a brief and comprehensive way by the contestants. The event "7 minutes of science" was a huge

success and witnessed active participation from the students of other

branches as well. The event proved to be highly informative about today's state-of-art technologies and innovations.

The audience gave a fair vote declaring Prabhat Kumar Sharma (Y16) first with Nisarg Bhatt (Y15) a close second and Sarthak Jain (Y16) as the second runner up and the event concluded with the release of ASME newsletter "Gearbox-3" by the HOD of MME Department "Dr. Manoj Kumar".
